

Project 1: Group 1

Feature-based Object Recognition

Find some specific objects within larger images.

(You can use any images you like for this.)

Project 1: Group 2

Panorama Stitching

Create a panorama image from two (or more) overlapping photos.

(You can use any images you like for this.)

Project 1: Group 3

Feature-based Image Forensics

Locate altered regions in some copy-move-manipulated images.

(You can use images from [Image Manipulation Dataset](#). But other images are also fine.)

Project 1: Group 4

Kaggle:

Leaf Classification

Project 2: Group 1

Kaggle:
Face Identification

Project 2: Group 2

Kaggle:

Real or Generated

Project 2: Group 3

Kaggle:
Dogs vs. Cats

Project 2: Group 4

Kaggle:

Natural Scene Classification

Project 3: Group 1

Kaggle:

Medical Image Segmentation

Project 3: Group 2

Kaggle:
Car Detection

Project 3: Group 3

Kaggle:
Fruit Detection

Project 3: Group 4

Inpainting with AI

Prompt an image synthesis model to generate a visualization of a possible design for my front garden, using a photo of the empty garden and a sketched planting plan.

(You can find the two input images in the projects folder of the OLAT course.)
